Thinking Out Loud

By H. M. L.

Representative Hatton W. Sumners of Texas, made a notable speech in the House of Representatives a fortnight ago. This is the same man who stood up boldly and refused to give way to the President when he desired to pack the Supreme Court. The newspapers do not, as a matter of fact, carry much of what is said in the United States Congress by the people's delegates there. But Sumners' address was reprinted and distributed to the press, and it is from that document that we quote a few passages on our national labor situation.

Sumners compares our labor strife with the situation in France, and quotes liberally from testimony heard in Congressional committees given by William C. Bullitt and Merrill C. Meigs of the OPM air division. It is not a pretty picture he limns. But it is one that careless and talkative patriots should ponder. It calls for action, positive, forceful. We set the forthright utterance of this great Texas Democrat against those that eminate from the White House. Sumner's address is a clear call to obligations and duties that all citizens who love their country should heed. Perhaps they are beginning to heed, for since the words that follow were uttered, the roll call of strikes in defense industries has measurably diminished. Here is the address, in part, of Representative Sumners:

"Then in 1928 public opinion shifted. The swing of the pendulum came and—I say this without purpose to offend—carried us to the point where we have had for some time practically a labor government at Washington. I mean exactly that.

"As a result, during the time of this swing, labor has been deprived of the necessary restraining influence of government, essential to the safety of any movement of that magnitude and momentum, and essential to the stability of gain. When the facts of these large movements are examined, it becomes clear that whenever such a movement gets under way and begins to accumulate momentum, its own momentum, especially if supported by public opinion, gives it all the speed it is safe to have. Speaking generally, the most dangerous thing in such a situation is for it to have not only no brakes applied by a public agency, but to have that agency provide an additional stimulus. There is a similarity in such matters everywhere, due to the fact that a natural law is in control and natural laws are uniform in their application.

"There is no difference between the human nature of the people who are in the factory and the human nature of the people who are in the offices. It will aid us in dealing with this situation, if we hold that fact in mind.

"It is not meanness. It is the danger which nature associates with too great speed and the limitation which nature puts upon the possessors of too great power. Whether it is a king, a hereditary noble, a church dignitary, a military chieftain, organized labor, organized capital, or I, as an individual, with the possession of too great power, there goes an irresistible disposition to abuse it. God has put a limitation upon the amount of power that people can possess without its abusive exercise. Aside from the disloyal element and the racketeer, it is a fact that just as capital was not able to restrain itself a short time ago labor has not been able to restrain itself in some of these strike situations, not because the are meaner, but because when capital moved this pendulum far from the center, when we were building up in this country an economic fuedalism, the men who worked in the

More Mines Acquired By Dr. Jones

Men Added At Mines Is On Increase

Total Number of Men at Work In County Now 2.622

Despite reports of the whole sale departure of men in Nevada City and Grass Valley for other fields of endeavor as a result of the defense boom, the gold mining industry in this county held its own as far as employment was concerned during the past month.

No large differences in the number of men employed were reported by the leading operating companies. In fact, due to the start of operations by several new outfits, principally placer, employment is slightly ahead of March.

The employment total for the mines in the county is 2,622 with a payroll amounting to $393,000.

The most important advancement to the industry during the past month was the acquisition by Dr. Carl Power Jones of two new properties adjoining the Mountaineer-Champion group.

It is believed extensive operations will begin at the properties in the near future.

The Gibson Dredging Company of Oroville completed the installation of a dredge outfit on the Martel property in the Rough and Ready district. Twelve men are employed.

Funeral Services Tomorrow for Mrs. Annie Ford

Mrs. Annie Ford, 78, mother of Mrs. Ed C. Uren of this city and well known here, died yesterday at the Jones Memorial Hospital in Grass Valley following a lengthy illness.

The funeral services will be held at 2 o'clock tomorrow afternoon at the Holmes Funeral Home in Grass Valley. Rev. Mark Pike of the Methodist Church will officiate. The Grass Valley Rebekah Lodge will have charge of the graveside services at the city cemetery.

Mrs. Ford was born in Grass Valley and during her life time of residence in this county made hundreds of friends in both her home town and Nevada City as well as other parts of the state.

She was active in many organizations. She was a Past Pocahontas of Ponemah Council, Past Noble Grand of Rebekahs, member of Mistletoe Circle, Companions of the Forest, member of the Native Daughters of the Golden West and of the American Legion Auxiliary.

Mrs. Ford was the widow of the late Henry Ford, who died in Grass Valley in 1894.

The deceased, besides Mrs. Uren, leaves another daughter, Mrs. Harry George of Grass Valley, three sons, Chester Ford of Grass Valley and Frank and Leonard Ford of Sacramento, 15 grandchildren and 15 great grandchildren. Mrs. Emma Crase and Mrs. Nettie Phillips of Grass Valley are sisters.

About six months ago a daughter, Mrs. James Harry of Sacramento, died. Mrs. Harry was a wife of Councilman Harry of Sacramento, who formerly resided in Gold Flat.

Mrs. Alta Rowe of Sacramento spent last weekend with Mr. and Mrs. C. E. Parsons.

Purchase of Ragon Mine and Grover Murphy Claims To Augment Present Extensive Mountaineer Holdings

WELL FINANCED CAMPAIGN OF DEVELOPMENT IN OFFING EXPECTED TO MAKE DISTRICT WHITE SPOT IN DEPRESSION WHICH WILL FOLLOW WAR

By ED. C. UREN

Dr. Carl P. Jones has recently purchased from Wells Fargo Bank the Grover Murphy Claim adjoining the Mountaineer on the north. This includes the American Hill vein, which is an extension of the Mountaineer Vein.

The American Hill was explored to a small extent in 1904 when the Simmons Brothers sunk a shaft 125 feet deep and extended a drift southward over 400 feet.

It is understood negotiations are pending for the adjoining Craig ground on the north.

Dr Jones has recently also acquired the Ragon Mine, which adjoins the Mount Auburn on the north, from the owner, Robert Nye. The property consists of two patented claims aggregating nearly 3000 feet along the lode.

The Ragon, last operated in 1936 by San Francisco parties, with Orlando McCraney in charge, has been opened by an incline shaft 440 feet in depth, dipping 40 degrees east. The ledge was first discovered in the progres of working the overlaying gravel channel and a shoot of ore 125 feet in length, above the 200 level, and having excellent milling values, has been stoped out.

The mine is still in an undeveloped stage. Hardly more than one tenth of its lateral extent, practcially all of which is lava-capped, has so far been explored.

Dr. Jones' holdings now embrace a territory four miles in length, extending from the Ragon on the north to the East Orleans on the southeast.

Four great vein systems are included: the Summit, or Gracie-Glencoe, one mile in extent, developed at one point to a depth of 40 feet, but with very limited laterals; the Mountainteer, 8600 feet in length, developed at one point to a depth of 1200 feet only; the Providence 16,000 feet in length, developed to 3,000 feet in depth and still going strong with an ore body at the bottom yielding higher values than ever known in any of the upper workings, but unfortunately halted over the protest of the management in 1921.

FIVE STUDENTS GUEST SPEAKERS AT ROTARY CLUB

Five high school students at the Rotary luncheon today were guest speakers under the program chairmanship of Helm Kjorlie. The five were Elsie Schreiber, Mary Innis, Ruth Mitchell, Kirk Martin and Walter St. John.

The topic was democracy, its ideals and practice, as contrasted with those of totalitarian governments, including Russia, Germany and Italy.

Mary Innis, the first speaker, described the historic background of dictatorship. She found that it was originally an Oriental philosophy of government. It began four thousand years ago in the Valley of the Nile,

Nevada City On Air Tomorrow Night

Nevada City will be on the air tomorrow night over KROY in Sacramento.

Secretary H. F. Sofge of the local chamber of commerce has received notification the broadcast will start at 8 o'clock. Local radio listeners are urged to tune in. KROY is 1240 kilocycles.

POPPY DAY DATE SET

May 24th has been set by the Banner Mountain Post, Veterans of Foreign Wars, as Popy Day in Nevada County.

The Veterans annual Buddy Poppy Dance will be held at Lake Olympia on May 31st.

Goes To Willits—

Mrs. Helen Sawyer is visiting her daughter in Willits. She will remain there for several weeks.

Narrow Gauge Railroad Near Abandonment In 1926, Prepares To Celebrate New Era In Dedicating Beautiful Grass Valley Terminal

In 1926, the Nevada County Narrow Gauge Railroad, due to the inroads made by automobiles on its passenger and freight business applied for abandonment.

However, the railroad was saved from oblivion by a group of progressive Nevada City and Grass Valley businessmen after they were promised full support by merchants, and mines in the district and the major oil companies.

Since those dark days of 1926 the Narrow Gauge Railroad, under its new progressive management, has advanced into a thriving business and at the same time has efficiently served the Nevada City-Grass Valley district.

And now a new milestone has been reached in the program of the NCNGRR. A new passenger depot, a longfelt need for Grass Valley, has been completed and tomorrow will be dedicated.

The passenger depot completed the modern, reinforced concrete terminal of the Narrow Gauge, a terminal not afforded in cities many times the size of Grass Valley.

The building plan started two years ago on Grass Valley's Old Chinatown after the shacks had been razed and the huge lot cleared. The first structure was the freight terminal. In this building is housed all the freight facilities of the railroad, the passenger and truck repair garage, cold storage facilities and modern general offices. Adjoining the main structure are facilities rented to the Rainier Brewing and Kraft Cheese Companies, which chose Grass Valley as the distribution center for a 100 mile radius.

Now the passenger depot, of which the NCNGR is justly proud, answers the long felt need for a proper dispensing of passenger travel information. The structure houses the latest inovations in speed and comfort demanded by today's travelling public.

Adolph Verlod, well known as the agent in the Nevada City office of the railroad company for many years will be in charge of the passenger depot. The freight transportation will continue to be handled by Robert Paine of this city.

J. Earl Taylor, director and general manager of the Narrow Gauge and life-time civic leader of the county, has issued an invitation to the general pubic of both Grass Valley and Nevada City to attend the

(Continued On Page Six)

GUESSING CONTEST

What's your guess?

Here's a chance to win a ride on a Greyhound bus. See a tire at the new Narrow Gauge Depot in Grass Valey and guess how many miles it was operated on a Pacific Greyhound bus. The contest closes at 6 p. m. tomorrow. The 11 guessing the closest to the actual number of miles will receive prizes, including free Greyhound bus rides.

Engine Of Golden Gate Ferry Boat Runs French Corral Mine

By ED. C. UREN

The old Southern Pacific ferry "Golden Gate" which tread the waters of San Francisco Bay from Oakland Pier to the ferry slips was a familiar sight to those visiting the "city" for many years.

She was one of the old type boats, converted to diesel electric power in later years and finally scrapped because, like all old timers, she had outlived her usefulness.

Purchased by the French Corral Mining Company the old engine now furnishes electric power for the drag line operations. Standing 10 or 12 feet high and some 30 feet in length in two units, this engine weighs some 60 tons.

One unit is in use, and it is rated at 550 horse power, using 15 gallons of diesel oil per hour.

The French Corral Company have several million yards of bench gravel, mostly stripped by early hydraulic operations, which is said to average, from top to bottom, 37 cents per yard.

The gravel in the old Tertiary Channel at French Corral has the reputation of being the richest hydraulic ground along any portion of the channel and large areas of the lower stratas nearest the bedrock, have not previously been worked on account of the problem of grade.

The company is busy at this time repairing its equipment and expects to be in active operation shortly. It is under the management of W. H. Rees of San Francisco.

It Takes A Gold Miner

The great game of gold mining was being discussed at a meeting of mining men the other day. The rising cost of materials, it was disclosed, of equipment, labor, social security levies, unemplomentt taxes. etc., in some instances are upping the cost of recovering a $35 ounce gold to nearly $40.

The speeches were waxing hot when up rose a Siskiyou mining man, Frank Smith, who has one of California's biggest hydraulic mines under development in the Happy Camp area—to deliver himself of this terse but eloquent comment:

"The cost load is heavy, particularly on the smaller operators, and it's rising. But, gentlemen, there can be only three things basically wrong with a gold mine. Those are insufficient financing, ineffecient management—and insufficient gold in the ground.

"Aside from those considerations, there's very little that can stop a gold miner."

That succint observation would do credit to a professional economist; the analysis will fit any business. Grocers, stockbrokers, farmers and businessmen in armies have tripped headlong over the thin shoestring of "insufficient financing". "Bad management" has ruined countless ventures. But "insufficient gold in the ground" is the complete and final frustration in any man's business.

"If you can recover on all three counts," Smith declared, you've got a gold mine; but it takes all three." And for dry, unwordy gems of wisdom, it still takes, it seems, an American farmer—or a California gold miner.—Contributed.

There Is One Sure Goal!

If you have rowed a boat across a wide lake in order to reach a definite point on the other side, you know that it's a good idea to look over your shoulder from time to time and make sure that you're still headed right.

This country is rowing pretty fast and furiously at the present time. It's a good moment to take a look at the objective, so we'll be perfectly clear where we're going.

National security is the port we have set out to reach. In the midst of a chaotic world, Americans have determined to make sure that the great advantages in living which they enjoy shall not be rubbed out through any neglect of carelessness.

Particularly prized have been the various liberties we in this country enjoy —civil and religious freedom, a political system of representative democracy, and the private enterprise system for earning one's living.

It is to defend these that Americans are arming in so determined a fashion. And, paradoxically, they are willing to accept the imposition of certain emergency regulations upon certain of these rights, knowing that they will thereby aid the defense effort. Just as heavier taxes are being accepted to support defense, so restrictions on business of certain kinds have been admitted necessary in order that the industrial machine can work most effectively for defense. For example, in certain cases where there is an extraordinary demand for materials needed in defense the application of priorities may be expedient. Export licensing to guard against depleting this country of vital materials and products might be another case in point.

There is surely, however, one paramount point to remember. The regulations are temporary. They have been accepted as needful by the people of this country because the people are convinced that the present emergency warrants their application. This being the case, all Americans, interested in the characteristic habits of life in this country, look forward to the day when these special reins and hobbles will be loosened.

After all, it is to guard against the universal spread of just such constraints that our national defense program has been embarked upon. Only upon those terms would it be worth the effort!—Contributed.

The reason why the average American jealously guards his right to say what he pleases is because he entertains the hope that ome day he will reach the point where he can afford to do so.

BOY SCOUTS HERE PLAN PROGRAM TO STRENGTHEN OUR DEMOCRACY

The Nation's 1,429,622 Boy Scouts, Cubs, Senior Scouts and adult leaders are now embarking on an intensive program in an effort "to make as substantial a contribution as is humanly possible to further strengthen and invigorate our democracy."

A detailed "program of action" released by Dr. James E. West, Chief Scout Evecutive of the Boy Scouts of America, has been received by the Tahoe Area Council which has jurisdiction for the Scout movement in Placer, Nevada and Sierra Counties.

The program, according to Guy W. Brundage. President of the Tahoe Area Council, involves the strengthening of every individual Troop, Cub Pack and Senior Scouting unit in preparation for whatever service opportunities lie ahead. New groups will be organized, enabling more boys to become scouts and thus increasing the number of those trained for service. Test surveys through the years, scout officials point out, have shown that three out of every four boys of scout age intensely desire to become scouts. The number of existing troops has never been large enough to meet this membership need.

Troops are being urged to recruit to full strength of 32 scouts if the available leadership is adequate to the responsibility. In some cases this will mean the addition of one or two trained adult leaders.

New Training Emphasis

While scout training has always been aimed at preparing scouts to be participating citizens, equipped for effective service to their home community and the nation, whatever the occasion may be, new emphasis is being placed on the Emergency Service Corps. These are primarily groups of senior scouts in every part of the nation, trained and esuipped for emergency service calls. They will in turn assist in training their younger brother scouts in the emergency service program so that ultimately every scout will be prepared.

In the thirty years the movement has flourished in America, scouts have rendered effective aid in earthquakes, tornadoes, floods and other catastrophes. Scout training has enabled boys to display resourcefulness and leadership.

The "program of action" calls for an intensive application of the normal training a boy receives as a scout, with emphasis on certain skills in the vigorous out of door programs of camping and hiking.

Camping is considered a most effective method of overcoming "softness," and developing those physical qualities essential for happy, effective and efficient life.

Mobilizations Prove Value

Scouts have been particularly effective in emergencies because they are able to mobilize speedily. There are several methods of mobilizing scouts. Troops will develop several plans, particularly those that can be employed when ordinary lines of communications are broken down. Such mobilizations show how many trained hands could be had for the emergency service in comparatively little time. These test calls have a value similar to fire drills in schools and drills aboard ships.

The hope is of course that fires never will occur or that it would become necessary to abandon ship. These drills, in peace and in war times, develop skill and confidence. Thus, when emergencies arise hysteria and danger are averted. The rescue of 320 child refugees aboard a British steamer en route to Canada early in September, without loss of a single child, was credited to the training given the youngsters.

Scouts are schooled to believe that the protection of the home and home folks in emergencies is a basic service responsibility, and that ... further afield is the responsibility of the more highly trained scout emergency service corps.

Make Emergency Equipment

Most troops will build their own emergency equipment including stretchers, traction splints, bandages and equipment for fighting grass and brush fires. Such gear as axes, shovels, kerosene lanterns, rope, blankets and staves will not only be used in training for emergencies, but will be stored and ready for use when emergencies occur.

Membership in the Emergency Service Corps of the Boy Scouts of America is limited to first class scouts 15 years of age or over, who have met special qualification tests. A careful physical examination is required of every member of the corps. Members of the emergency corps are to serve as instructors and technicians in various fields of emergency service in their respective troops and communities.

Scouting's Responsibility

Dr. West feels it is the responsibility of everyone in scouting in normal times and especially in times of national emergency, to be prepared to meet every opportunity for service. This, he points out, is expected not only because of the pledge each scout and leader takes to "do his duty to his country," but because of the special training which scouting gives the boys in patrols and troops and also through the development of leadership qualities in older boys and scout leaders.

Former Camptonville Resident Succumbs

CAMPTONVILLE, April 17. — Word was received here Tuesday of the death of John Kraig which took place Sunday at the Yuba County Hospital at Marysville following an illness of two months.

Deceased was born in New Jersey and came west when young spending most of his life in the bay area. He came here about ten years ago and worked for a time on the Rogers mining claims at Oregon Creek. His health became poor and he moved to town and spent the rest of life in his cabin on Jackson Street.

He is survived by a sister and a niece living at Berkeley. Funeral services were held at Marsyville Monday under the direction of Hutchinson & Merz, with interment in Sierra View Memorial Park.

WITH YOUR ASSEMBLYMAN THURMAN AT THE STATE CAPITOL

A great deal has been written about lobbyists and two or three of the daily newspapers would have the people believe that the lobbyists run the legislature. Even representatives of these same newspapers have men who lobby against legislation that would be harmful to the newspaper business and lobby in favor of legislation which would be of benefit to the newspaper business.

THURMAN

The same can be said for other industries, business, labor and agriculture.

There are between 250 and 300 so called lobbyists representing every kind of business, industry, labor or agriculture and other interests before the legislature. All of them are registered as is required by law.

Included in this group are representatives who are spokesmen for business and industry, big merchants and little merchants, union labor, and farm bureau, the Grange, the druggist, the barber, the hair dresser, the medical profession, the undertaker, the CIO, the AFL, Labors Non-Partisan League, womens clubs, district attorneys, dentists, churches, the WCTU, the gold mining industry, the sportsmen, the railroad brotherhoods, the steam railroads and the electric railroads, the registered nurses, the hospitals, the moving picture industry, the theatres, the oil industry, the telephone companies, the dairy business, insurance companies, veteran organizations and many other groups.

Even the State of California maintains a lobbyist in the nation's capitol while the governor of the state has a contact man who is in every sense of the word a lobbyist.

The various state departments have contact men who are registered as lobbyists and who, lobby for department bills before the legislature. Such departments include the Department of Public Works, the Department of Natural Resources, the Motor Vehicle Department, the state highway parol and several other departments.

Because of much misinformation, the name lobbyist, to many people, is an indvidual who plays crooked politics. This of course is not the case. While there are no doubt crooked lobbyists just as there are crooks in other walks of life, on the whole the lobbyists are men and women who are sincere and who are working to protect the nterests they represent from harmful and unjust legislaton.

Labor is well represented before the legslature to protect labor from unjust laws. The same goes for business and agriculture. The representative of the gold mining industry must protect that industry from laws which would be harmful.

These representatives, known as lobbyists, appear before the various committees either sponsoring or opposing legislation. If they did not then labor, business and agriculture would suffer because your legislators would not hear both sides of the argument. Lobbyists are necessary and there are laws on the statute books to take care of the so called crooked lobbyists.

Legislators from the metropolitan areas know little or nothing about agriculture but they can learn something about the farmer's problem if a representative of agriculture appears before them nd tells the story of the farmer's problem.

The crooks who may be lobbyists can be eliminated but because now and then one crooked lobbyist may be found is no reason to judge the legitimate representative by the actions of a crook.

Lobbyists are necessary and they do not run your legislators whether they be representatives of business and industry or the state government.

Books are standing counselors and preachers, always at hand, and always disinterested; having this advantage over the oral instructors, that they are ready to repeat their lesson as often as we please.

The book to read is not the one which thinks for you, but the one which makes you think. No book in the world equals the Bible for that.

A testimonial meeting is held the first Wednesday of each month at 8 p. m.

"Doctrine of Atonement" will be the subject of the Lesson-Sermon Sunday.

The Golden Text will be: "All things are of God, who hath reconciled us to himself by Jesus Christ, and hath given to us the ministry of reconciliation" (II Corinthians 5: 18.) Other Bible citations will include: "Let us hold fast the profession of our faith without wavering; (for he is faithful that promised;) And let us consider one another to provoke unto love and to good works:" (Hebrews 10; 23, 24.)

The Lesson Sermon will also include the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "If Truth is overcoming error in your daily walk and conversation, you can finally say, 'I have fought a good fight—I have kept the faith,' because you are a better man. This is having our part in the atone-ment with Truth and Love" (p. 21.)

GEMS OF THOUGHT

LITTLE THINGS

The power of little things to give instruction and happiness should be the first lesson in life, and it should be inculcated deeply.

—Russell H. Conwell

Most of the critical things in life, which become the starting points of human destiny, are little things.

—Robert P. Smith

Seeing that we have to attain to the ministry of righteousness in all things, we must not overlook small things in goodness or in badness, for "trifles make perfection," and "the little foxes—spoil the vines."

—Mary Baker Eddy

Trifles discover character more than actions of seeming importance, what one is in little things he is also in great. —Swift

In great matters men show themselves as they wish to be seen; in small matters, as they are.

—Gamaliel Bradford

It's just the little homely things,
The unobtrusive friendly things,
The "won't you let me help you" things
That make our pathway light.

Grace Haines

CATHOLIC CHURCH

Two masses will be celebrated at the St Canice Catholic Church Sunday. The first mass will be at eight a. m. and the second at 10 a. m. Father Patrick O'Reilly and Father Edward Williams will have charge of the services.

Navy Recruiting Officer Here Tuesday

A recruiting officer of the U. S. Navy will make his headquarters in the Chamber of Commerce office next Tuesday and every following Tuesday in the immediate future. Young men who desire to enlist in the navy can make their applications through him.

LIFE TERM IS LOOMING FOR TRAIN WRECKERS

SACRAMENTO, April 17.—Additional protection for the shipment of vital defense materials as well as for passengers and trainmen is assured by Senator Jerrold L. Seawell's bill increasing the penalties for train wrecking.

Life imprisonment without possibility of parole is the penalty set forth in Senator Seawell's measure for any person who wrecks a train, or who throws a switch, removes a rail, places any obstruction or explosive or sets fire to a bridge or trestle with the intention of causing a wreck.

The death penalty is provided for anyone who intentionally causes a wreck in which any person is injured.

Twenty years in prison is the maximum sentence under federal laws for train wrecking, regardless of how many persons may be injured or how much property damage results.

Alturas Visitor—

Mrs. Leland Smith and her mother, Mrs. J. Caldwell of Alturas spent yesterday in Sacramento. Mrs. Caldwell leaves for her home today.

NOTED CHOIR TO SING HERE NEXT SUNDAY EVENING

An Easter Cantata service will be rendered by the choir of the Central Methodist Church of Sacramento next Sunday evening in the local Methodist church, it was announced today by the pastor, the Rev. David Ralston. This is one of California's notable choirs, such as are rarely heard in Nevada City. The public is cordially invited to hear it.

Sunday school at 10 a. m. Preaching service at 11 a. m. Organ prelude, Miss Sue Hawkins. Introit choir. Hymn 2. "Come Thou Almighty King", congregation. Prayer pastor. Scripture reading. Choir selection "Fairest Lord Jesus." Responsive Scripture reading. Offering and offertory. Hymn 169, "Ye Servant of God Your Master Proclaim" congregation. Sermon "The Emmaus Walk" pastor. Hymn "My Faith Look Up To Thee," congregation. Closing prayer. Doxology. Epworth Leagues at 6 p. m. All the young people are cordially invited.

Easter Cantata at 7 p. m. By the Central Methodist Church, Sacramento. Cantata "The Dawn of Easter" by Ira B. Wilson. Hymn "Christ the Lord Is Risen Today," congregation. Prayer, pastor. "For Our Transgressions" choir. Duet and choir. "The Master Is Asleep" Chas. Tipper and Betty Merrifield. "Our Hopes, Our Dreams Are Dead" Men chorus. Duet "Let Not Your Heart Be Troubled" Grace Fenley and Vernon Richards. Scripture reading. Soprano solo "Tomorrow" Mrs. Reginald Tipper. "Day Is Breaking" choir. Offering and offertory. Women's chorus "He Is Not Here." Solo "O Ye of Little Faith" Miss Luvee Sargent and choir. "He Is Risen" choir. Sermonnette "Hope In a Crashing World, pastor. Finale "Thanks Be To God" Trio, Clifton Crosby, Mrs. G. Swalley, Mrs. Tipper and choir. Benediction.

Personnel of the choir. Sopranos, Mesdames J. E. Irvone, A. B. Pendleton, T B. Hyatt, J E. Merrifield. Margaret Houghton, Merrill Wilcox, Reginald Pipper, Alex Marr, Misses Katherine Stonson, Emily Hanisch, Evelyn Healy, Luvee Sargent, Dorothy Pitts. Altos, Mesdames Grace Swalley, Paul Govette, B. W. Viau, Misses Martha Chivell, Betty Merrifield, and Grace Fenley. Tenors, Vernon Richardson, Kenneth Russell, Howard Thompson. Bass, Clifton Crosby, Ellis Brown, John Abbott, Henry Grell, Reginald Tipper. Conductor Reginald Tipper. Accompanist Mrs. O. H. Poling.

Week events—Bible study and prayer hour Tuesday at 7:30 p. m. Choir practice Wednesday at 7:30 p. m. Young people's prayer hour Thursday at 7:30 p. m.

Outstanding Social Event Of Local High School Will Be Held Tomorrow

One of the Nevada City High School's most outstanding yearly events will be held tomorrow night at the school auditorium.

It is the Junior Prom. Miss Billie Keller, junior class president, is general chairman of the committee arranging for the prom.

Clement Henwood, chairman of the advertising committee, is conducting an extensive ticket sale campaign. Guest cards are required for those planning to attend who are not students at the school.

VITAL STATISTICS

Local Man Detained By Capital Police

Deputy Sheriff Harry Knoll of Sacramento detained Thelma Richardson, 16, of Smith Flat, El Dorado County, and her brother in law, Edward Tafolla, 26, of Nevada City, as they alighted in Sacramento from a stage. Knoll said the girl's parents Mr. and Mrs. W. C. Richardson, informed the officers the girl left home without permission.

Gets Two Of Three Big Rattlesnakes

By Richard Louis Haley

W. N. Haley of Nevada City was getting wood when he saw three rattlesnakes. He killed two of them with the axe but one got away in some bushes close by. One of those he killed had seventeen rattles and the other had eleven rattles.

Alleged Sale of Liquor To Minor Results In G. V. Arrest

R. A. McBride, proprietor of the LaRosa Inn in Grass Valey, pleaded not guilty to a charge of selling liquor to minors following his arrest by Sheriff Carl J. Tobiassen and Russell B. Farley, special investigator for the state board of equalizaton.

McBride is held in the county jail here pending his trial. His arrest was the result of stories told the officers by Frank Walling 17; Earl Darling 21, and Ernest Turner 18, Civilian Conservation Corps youths, who said they stole to purchase liquor from McBride.

Farley said Probation Officer A. W. McGagin has entered the investigation and additional arrests may be made. The youths assertedly told of other liquor establishments who sold them intoxicants.

Taxpayers - Attention!

The second installment of property taxes for Nevada County is due and payable and becomes

DELINQUENT ON APRIL 20, 1941
at 5 o'clock P. M.

Unless paid prior to that time 3% will be added to the amount due, together with a further charge of 50 cents for each piece or parcel of land separately assessed and for each assessment of personal property. Taxes payable at the Treasurer's Office, Nevada County Courthouse, Nevada, City, Calif.

FRANK STEEL, Ex-Officio Tax Collector.

THINKING OUT LOUD

(Continued from Page One)

factory had no choice except organization or economic peonage.

"Public opinion shifted its support to labor just as they are going to shift from labor if labor does not watch its step in this time of world crisis and national peril. It must clean itself of those who are squandering in a perfect debauch labor's hard earned support of public opinion. It must help to render powerless those who because of a foreign allegiance are fighting now the battles of dictators, fighting them in the factories of our country.

"This is the day and the hour when people in our position cannot count the cost. I do not pose this afternoon. I think I speak your own sentiments in this hour of our nation's peril. There is no human being on earth that can give to me or take from me anything that is of the slightest relative concern now. Our jobs are contemplated in their relative littleness now.

"All over the world men are dying that people may be free. Neither you nor I nor anyone else in any office should be permitted by public opinion to stand guarding anybody's position or policy as against the imperative necessity for the greatest possible efficiency and haste in the preparation for the preservation of our nation—preparation for every possible emergency. I do not care who is he or where he is. I do not count. You do not count. Individuals do not count. These are times when people who are fit to live are willing to die for the things which make living worth while.

"The Maginot Line was gone in France before the French people realized it was a fact. Read Mr. Bullitt's testimony. We have a Maginot Line upon which we are putting a dependence similar to that which the French people placed in theirs, some floating battleships, a thin line of battleships on the seas. Suppose that line breaks. We know we do not have the equipment to defend our ports against a major attack. Let us not argue that fact out of our minds or ignore the warning of intelligent caution.

"In such situations intelligent people with so much at stake act as though possibilities were certainties. Yet here we are half working at the job, the only one we have, relatively speaking, worthy of consideration, talking about social gains, talking about profits, actually closing factories while we quarrel about them.

It is pathetic to see people scrambling with each other to make profits, to make merchandise out of the necessity of this great Republic which possibly tomorrow as time is measured in the development of great events, may be fighting for its life.

"We fight among ourselves, we stop the wheels of production of essential war materials, trusting to a thin line of battleships across the two oceans—our Maginot Line. What if it breaks? We are telling all the world to stay out of this hemisphere, telling people how to run things in Asia, Africa and Europe.

"We are partisans in the intracontinental wars of the world while short sightedness, greed, selfishness, ambition, and positive disloyalty among only a small percent of our people imperils the nation and leaves the flower of our manhood wearing the uniform of their country but inadequately equipped either to protect themselves or defend their country."

The Stage Coach Is Gone
And the Wash Tub is Going

Nowadays people ride in motor cars and airplanes and send their soiled clothes and household linen to an up-to-date laundry, removing from the home the back-breaking drudgery, the uncertainty of clothes line weather, and the general Monday morning upheaval that goes with the old wash tub. Those that send their laundry and clothes cleaning to us, never go back to the old wash tub and clothes line system.

SIDELIGHTS OF SNIDER RESCUE

RANGER CARRIED PIGGY-BACK ACROSS RIVER

SPENDS 44TH BIRTHDAY ALONE

The tractor on which the party had hoped to reach the shelter hut remains almost buried in mud two miles from French Meadows Guard Station and will be there until another tractor and truck can be taken in to extricate and transport it out. Forest Engineer C. E. Herbert, Fire Assistant Ray Ogden, and Tractor Operator Graham Davenport, worked on the tractor all night while the remainder of the party continued on to the hut. They tried binding logs to the tread, pulling out by the winch on the tractor, etc. but all efforts failed.

* * *

Young and husky Assistant Ranger Bob Cron back-packed Snider across 37 side streams, some nearly 50 feet wide. Snider says wading across the America River at 7 a. m. was not very pleasurable for the boys.

* * *

The job of pulling Snider the 9 miles on an improvised toboggan to where the trucks were parked was made exceedingly difficult by snow conditions. It was through a timbered country and the snow even where 8 or 9 feet deep had melted to the bare ground around the trees. It meant constantly being on the alert to prevent slipping into these craters, and a smooth stretch of level snow 100 feet in length would have been welcome. The snow surface made the boys think of what a field would look like after a hundred Stuka bombers had worked it over.

* * *

In dropping the food, one parachute failed to open. The package happened to contain the eggs and pancake flour. If the materials had not been scattered all over the snow they would have had hotcakes ready mixed.

* * *

One package contained the fresh vegetables and fruits. It hit the side of a tree and Jih Wheeler was busy retrieving oranges, asparagus and so forth.

* * *

Snider's 44th birthday was passed in the hut. For his first dinner at home the dessert was birthday cake prepared by Mrs. Snider. His boys, Howard, 8, and Kenneth, 13, had taken great pleasure in arranging birthday candles to spell the words, "Dad." When the job was finished, they found they had 45 candles instead of 44.

"Oh well," they said, "that will be 44 and one to grow.

* * *

Snider suggests anyone in like situation give careful thought in keeping in the best physical condition possible. He realized the trip out would be an ordeal and prepared for it by daily hopping back and forth on one foot in the approximately 3 x 10 foot space he had available, and chinning himself on the convenient 2x4. The exercise gained in hopping stood in good stead, especially when the men pulling the toboggan were exhausted. At Snider's suggestion he skiied for several miles on one foot, with a man on each side supporting him. This proved especially strenuous too, on account of the broken snow terrain.

LEGAL NOTICES

NOTICE OF SALE OF PROPERTY DEEDED TO THE STATE FOR DELINQUENT TAXES

Date: April 17, 1941.

Whereas, I was on the 3rd day of April, 1941, directed by the Board of Supervisors of Nevada County, California, and there was received by me and filed in my office an authorization of the State Controller, dated April 7th, 1941, to sell at public auction, for cash in lawful money of the United States, certain tax deeded property, public notice is hereby given that unless the said property is redeemed as provided by law, I will on the 13th day of May, 1941 at the hour of 10 o'clock A. M. in the Tax Collector's office in the Court House, City of Nevada, County of Nevada, State of California, sell as directed the said property for a sum not less than the minimum price set forth in this notice.

The parcels of property that is subject to this notice is situated in the County of Nevada, State of California, and is described as follows:

All the mineral beneath the surface of the following described property: In Nevada City, W 185 feet of Lot 5 Block 43; Lot 6 Block 43; Lot 7 Block 43; N. part of Lot 3 Block 43;

Minmum price $65.00.

Assessed to H. H. Noble for the years 1919 to and including the year 1925.

If redemption of the property or the initiation of an installment plan of redemption is not made according to law prior to the sale thereof, the right of redemption will cease.

FRANK STEEL,
Tax Collector, Nevada County, California.

Date of first publication April 17, 1941.

Relief Hill And Omega Operations Expected To Be Joined By Many Others

Hydraulic mining experts believe $600,000,000 has been made accessible to operators by the completion of the Upper Narrows Debris Dam.

The Relief Hill Mine, managed by Claude E. Clark, is credited with being the first hydraulic property to obtain a permit from the California Debris Commission to operate behind the debris barrier.

The Relief Hill has one monitor operating in tearing down huge gravel banks for the precious gold contained therein with another giant expected to be ready for use within a week.

The Omega mine above Washington was the second hydraulis propert to begin operation. Three monitors are being used at the Omega, shooting hundreds of yards of gravel per day through the sulice boxes.

While the Relief Hill and Omega properties are the only ones seeking the purported $600,000,000 in gold buried in the gravel banks of the vast North San Juan Ridge, it is expected before many ears many hydraulic ventures will be under way.

Congressman Harry L. Englebright of Nevada City, called the "father" of the resumption of the hydraulic mining industry, is responsible for the statement $600,000,000 lies buried in the gravel behind the Upper Narrows Dam. The Nevada City Chamber of Commerce estimates 286,000,000 cubic yards of gravel is available for the giants.

Hydraulic mines were operating full blast when the Sawyer Act in 1884 prevented hydrulicking unless done behind a dam to stop the debris from filling the streams in the valleys. In recent years, legislation was pushed in congress for federal funds to construct debris barriers.

The Upper Narrows Dam, built at a cost of $4,000,000, is one of three such barriers. The cost of the dams will be repaid by the hydraulic operators, who will be charged between one and two cents for each cubic yard of gravel hydraulicked.

Men Added At Mines In County

(Continued From Page One)

in the Alta Hill district for several years, has started dewatering the St. John shaft.

In Sierra County, as well as Nevada County, residents will be pleased with the news operations will again be resumed soon at the Plumbago Mine.

Mining Engineers Name Fred Denton President

The Nevada County Branch of the American Institute of Mining Engineers reelected Fred Denton, Jr., as chairman at a meeting in Grass Valley. John Franz was named vice chairman; Earl Schwabenland, secretary-treasurer and Arthur B. Foote and Arthur Swanson board members.

William Simkins, official of the Newmont Mining Corporation, spoke at the meeting.

Employment On Increase Idaho-Maryland Mines

During the past month, the Idaho-Maryland Mines Corporation added 11 men to its crew at the New Brunswick Mine and nine men to the Idaho-Maryland payroll.

The Idaho-Maryland, the state's leading gold producer, now employs a total of 961 men at its three properties, the Brunswick, Idaho and the Bullion.

ACCEPTS OTHER POSITION

Bert Hardin, formerly mill superintendent at the Lava Cap Mining properties has left for South America where he will be employed in an executive capacity with a mining concern.

To Spend Weekend Here—

Troy Keller of Los Angeles will spend the weekend here with Mr. and Mrs. George Keller.

Here On Business—

Russell B. Farley, inspector for the state board of equalization, is in this city on official business.

HYDRAULICKERS MEET SATURDAY

An important meeting of the California Hydraulic Mining Association will be held Saturday afternoon at the National Hotel here.

The meeting will be an extended meeting of the one held in Colfax last Saturday night. Additional nomination of officers will be received from the floor.

President George Hallock and Secretary W. W. Esterly urge a large attendance.

Plumbago Mine To Be Reopened

Expectation is that the Plumbago Mine in the Alleghany district will be reopened soon.

The mine, one of the most famous producers of the noted Alleghany district, has been shut down since last October.

Thomas A. Wood, Arizona engineer, has been inspecting the mine. One report is that Wood is an engineer for the Phelps Dodge Corporation but this has not been verified.

It was reported the new operators will start work within the next few weeks.

(Continued From Page One)

owing to post war conditions, which also halted work at the Brunswick; the Champion, 6000 feet in length, partly developed to 2400 feet but with an unprospected footwall area which those familiar with the mine declare will disclose ore bodies extending down from the 1000 on the north; and the Gold Tunnel, which can be traced for more than a mile north of the Summit fissue, developed to a depth of 700 feet — the first mine worked in the district and credited with a yield of $300,000 prior to 1855, much of the ore paying $50 per ton.

In all there are over 50 mining locations, besides extensive mineral holdings under agricultural patents. Within this area, which has already yielded as estimated 40 million dollars in gold, are veins which admittedly, have never been bottomed and which await modern intensive development—something these mines, without exception, have never been subjected to.

Here are four prominent parallel systems of north-south, east dipping veins, which are one to three miles in lateral extent, and on neither vein at any time in the past, has any serious attempt been made to keep the ore developed more than a few weeks ahead of mill capacity.

With a well planned and financed campaign of development, which seems to be in the offing, we hope and we believe that this district will again become one of the white spots in the depression that is sure to follow in the wake of the war we are entering upon.

MRS. RAYMOND C. STEGER IS HONOR GUEST AT SHOWER

Misses Marie Andreini, Virginia Carney and Dorothy Thomas entertained at a linen shower in honor of the former Miss Margaret Stevens, who became the bride last Saturday night of Raymond C. Steger.

The shower was held at the home of Miss Andreini on Nimrod Street. Pink candles with tulips and sweetpeas as the centerpiece were the table decorations. Miniature pink and white umbrellas were used as table favors.

Following the playing of Dutch Whist refreshments were served. First prize for the evening went to Betty Tamblyn. Ruth Hutchinson won second prize; Ruth Tamblyn, third and Bettie Stevens consolation prize.

Those present included:

Hazel Whitford, Irma Steger, Ethel McCormack, Esther Coughlin, Marguerite King, Betty Tamblyn, Ruth Tamblyn, Louise Noyes, Bettie Stevens, Margie Keckler, Mary Lou Keckler, Ruth Hitchinson, Rita Hutchinson, Ida Pratti, Mamie Fradelizio, the honor guest and the three hostesses.

Those who were unable to attend but sent gifts were Elizabeth Brisebill, Catherine Stephens, Madeline Himes and Dorothy Pierce.

HOME NEAR COMPLETION

The new home of Mr. and Mrs. Louis Kopp, under construction at Piety Hill, is near completion.

Miss Catherine Stephens Engaged To Marry William Sutherland

The Miss Catherine Stephens and William Sutherland engagement was announced at a gathering at the home of the bride to be's parents, Mr. and Mrs. Rutherford Stephens.

Miss Stephens, one of the most popular of the younger set of this city, is employed by the Inter-County Title Company. She is a graduate of the local high school and Mr. St. Mary's Business Academy.

Sutherland is employed at the Grass Valley Branch of the Bank of America. He is the son of Mr. and Mrs George Sutherland of Oakland.

No date has been set by the couple for the wedding.

POSSE REORGANIZED

A reorganization meeting of the sheriff's mounted posse was held Monday night in supervisors' room at the courthouse. The posse was originally organized last year and paraded in the Nevada City Fourth of July celebration.

Guest of Jacksons—

Miss Dorothy Jones of San Francisco spent Easter in this city as the guest of Mr. and Mrs. J. J. Jackson.

Visitor Here—

Herman Clendenning of Camptonville was a Tuesday visitor in this city.

P. T. A. Will Meet Tomorrow Afternoon

The Elementary School P. T. A. will meet tomorrow afternoon at 2:30 o'clock n the elementary school auditorium with officers for the new year in charge. The new officers are Mrs. M. Earl Jones, president; Mrs. L. G. Lageson, 1st vice resident; Mrs. Popovitch, 2nd vice president; and Mrs. Helen Berger, secretary.

The program tomorrow will be the annual T. B. review of progress made and future measures projected. Miss Beatrice Woodward, district health nurse, will be the principal speaker. The primary class of Miss Gertrude Goyne will provide the music. Tea will be served by a committee of which Mrs. Clyde Gwin is chairman.

Sofge and Foreman Will Represent N. C. At Highway Meeting

H. F. Sofge and Bert Foreman will represent the local chamber of commerce at the meeting of the Tahoe-Pacific Highway 20 Association meeting, which opens tomorrow in Willits

The two men will be accompanied by their wivies. The Tahoe-Pacific gathering will be for three days. Much important business toward promoting travel over the Tahoe-Pacific Route, which starts at Emigrant Gap, is expected to be accomplished at the meeting.

Governor Culbert Olsen and several state senators and assemblymen are scheduled to be present.

Gold Flat Native Dies In Oakland

Roger (Owen) Dougherty, 65, a native of the Gold Flat district near here, and one of the firt mners to reach Tonopah, died in his home in Oakland this week. Funeral services were held in that city yesterday.

The deceased purportedly made a fortune leasing at Tonopah. He leaves his wife, Mrs. Rose Dougherty; two brothers, Eugene Dougherty of Angels Camp and Charles Dougherty of Nevada City and two sisters, Miss Frances Dougherty and Mrs. Hannah smert of Oakland.

Dr. Topic Here Today—

Dr. John R. Topic, recently assigned to army medical duty, was a business visitor here today.

Florence Kjorlie Speaks At Meeting Of Forestry Group

Mrs. Florence E. Kjorlie of this city, conservation chairman of the National Federation of Womens Clubs, spoke at a meeting this week in Los Angeles of the American Forestry Association.

Mrs. Kjorlie said "impoverished soil impoverishes its people and impoverished people soon breed seeds of social unrest."

"There is no need for the people of the West to let this condition further undermine our economy," Mrs. Kjorlie stated. "We can attack the problem now, thus overcoming that dreaded foe before it overcomes us. The women of the West must give added support to this problem."

Narrow Gauge Railroad Depot

(Continued from Page One)

open house tomorrow from noon until 10 p. m. at the new depot. The actual dedication ceremonies are scheduled to start at 8:30 p. m. following a pre-dedication dinner at the Bret Harte Inn.

Opening remarks at the dedication will be made by George Calanan of Nevada City, a director of the railroad. Commander A. W. Scott, world wide traveller and radio personality known to thousands of radio listeners through travel talks sponsored by Greyhound, will take over as master of ceremonies. Commander Scott will award the 11 prizes winners of the guessing contest sponsored by the Narrow Gauge at the public dedication.

Mayor John Thomas of Grass Valley will accept the new depot on behalf of the citizens of the county.

One of the proudest men at the pre-dedication dinner and at the dedication will be General Manager Taylor.

"The Narrow Gauge appreciates the loyalty during the past 15 years of the merchants, leading oil companies, public utilitie, mining companies, uublic utilities, mining company and the general public that has made possible the fulfillment of the dream to provide the very best of transportation in the Nevada County Field," Taylor said.

During the years of Taylor's management of the railroad, streamlined busses have replaced the steam load passenger service. Overnight package freight service from San Francisco has been provided and pickup and deliver service afforded.

The invited dignitaries to the pre-dedication dinner are:

Board of Directors: J. Earl Taylor, F. F. Cassidy, George Calanan, William Tamblyn, James Tyrrell and Rose Geronimi; Nevada City officials: Irving Seaman, Robert Nye, Frank Davies, Dr. J. R. Ivey, Mayor Ben Hall, Chief of Police Max Solaro, Superintendent of Streets Herbert Hallett and Fire Chief Luther Marsh; Grass Valley officials: Mayor John Thomas, Jack Hansen, Dick Trathen, Jack Fontz, Harry Nickols and Ben Jenkins; Highway Patrol: Eben K. Smart and Joseph Blake; Grass Valley Chamber of Commerce, Edith Scott and Vernon Stoll; Nevada City Chamber of Commerce; Guerdon Ellis and H. F. Sofge; Nevada City Rotary Club: Walter Carlson and Fred Garrison; Grass Valley Rotary; E. E. Hoss and Harold Robinson; Grass Valley Lions: Alvon Jones and Ralph Deeble; Business and Professional Women's Club of Nevada City: Betty Pierce and Ethel White; Grass Valley BYWC: Arletta Douglas and Thelma Sahl; Stage operators: Mrs. Vinita Jones, M. P. Fischer and Joe Spence; Southern Pacific officials: M. A. Peck, district passenger agent, Robert Gilmore, assistant vice president and Ira Blalock, travelling agent; Greyhound officials: Commander A. W. Scott and W. H. Starling; Railway Express officials: J. Henwood and C. H. Hansen; Press: Earl Caddy, M. Henry Argall, E. J. Kinyon, Robert Ingram, H. M. Leete and T. Arden; Mine Workers Protective League: Olney Donnelly and Ed Jones; Mine operators: Empire, Idaho-Maryland, Lava Cap, Spring Hill and Golden Center officials; Postmasters: Betty Martin West and Roy Terrill.

CAMPTONVILLE NOTES

CAMPTONVILLE, April 17.—F. Williams left Sunday for Sacramento after spending Easter week with his parents here.

George E. Butz came down from Forest Saturday evening to spend the week end at his home.

Mr. and Mrs. Erle Pauly and son Paul, Mr. and Mrs. Howard Wentworth returned to their homes at Oakland after a week end visit with relatives here.

FIVE STUDENTS

(Continued from Page One)

and ultimately triumphed in Rome. It entered Northern Europe by way of the Holy Roman Empire, and after the middle ages was revived in Germany by Bismarck, who was in the way of being a Prussian dictator himself.

Ruth Mitchell carried the theme further, describing the institutions and ideals of the two forms of government. She noted that democracies seek a truly representative form, in which the people have the final word in all branches of government, whereas in the totalitarian governments that is left usually to one man, but may be controlled to some extent by the council of select few.

Walter St. John gave a resume of the freedom which individuals enjoy under democracy. He compared the uses of the press, the radio, the ballot, and churches in the two opposing governmental farms. He pointed out that under democracy there is always the opportunity for individual growth, whereas under the dictators, the individual is only a servant of the state.

Kirk Martin compared the effects of government upon the peoples under democratic and authoritarian. He used a clever simile, that of the see-saw. In a democracy the see-saw evenly balances but in totalitarian governments the see-saw is shortened at the people's end, that they are constantly up in the air.

Elsie Schreiber declared that when democracy goes to war it forfeits its democracy. War and democracy, she declared, were contradictory terms. War of itself creates a dictatorship. Her appeal was to cure the present defects in our democracy and thus o set a shining example for all the world to see. She mentioned the housing problem, the problem of unemployment, and other domestic difficulties with which the United States is faced. These she held to be of first importance, rather than fighting to save democracy and thereby losing it.

Fathers of the youthful speakers were guests of the club.

Why does a Golf Ball bounce?

EVER notice that a golf ball, when you drop it, bounces higher than something hollow, like a tennis ball?

That's partly because of internal *pressures*, which also have so much to do with Buick's extra FIREBALL power.

Rubber threads inside a golf ball are packed *tight*, highly compressed. When flattened against a hard object, like a sidewalk, they come back harder, with more push, and so the ball bounces higher.

A similar thing happens inside a Buick FIREBALL straight-eight cylinder.

Fuel compression *pressures* are higher here than in any other standard-production automobile engine.

So when the spark jumps in the tightly-packed, fuel-fat ball of gas-mixture at the top of the stroke—the Buick piston goes rushing down with *more* push, *more* shove, *more* power than the same amount of fuel gives up elsewhere.

Result: every Buick engine travels farther per gallon this year than the same-size engines did last year, while Compound Carburetion* with Buick FIREBALL design gives as much as 10% to 15% more miles per gallon.

In fact, if you're buying any car this year, it's pretty important to see and drive a Buick before you're through; it's Number One in smart engineering as well as Number One in solid, rock-bottom, all-round VALUE!

BUICK PRICES BEGIN AT $915 for the Business Coupe delivered at Flint, Mich. State tax, optional equipment and accessories—extra. Prices subject to change without notice.

*Optional equipment on the Buick SPECIAL, standard on all other models.
